

Lodge-ical News – December 2006

2006 is quickly winding down and soon most of you will be busy booking new reservations. We hope everyone had a chance to spend the Christmas season with family and close friends.

Montana Outfitters and Guides Association (MOGA) Winter Convention

We will be attending the MOGA Winter Convention in Bozeman on January 4 and 5. If you plan on attending the show, please make sure you come visit us in the exhibit hall. If you would like to set up an exclusive meeting with us, please contact us as soon as possible to schedule a convenient time. For more information regarding MOGA, you can visit their website <http://www.montanaoutfitters.org>.

User Tip: What is a Guest Link?

For those of you using version 7.0, you will see a button at the bottom of the Reservation Entry form called Guest Link. This button provides the following features:

- 1) Select all clients, sub clients, and/or reservations that are part of the reservation. In other words, you can link the Smith reservation to the Jones reservation to show they are traveling together. You can link sub clients to the reservation (i.e. family members who have their own personal data record). You can link clients to the reservation representing group members of the reservation.
- 2) Lodge-ical allows you to print mailing labels for guests who do not have a reservation but who are linked to a reservation. So, in the example above, if you link clients to a reservation, go to the Find-A-Client form, enter a Visit From/To date range and you will see both main reservation clients and linked clients appear in the query.
- 3) When entering Personal Data into Lodge-ical for a particular reservation, you will only be able to select from a list of clients and sub clients that have been linked to the reservation.
